

Spring Checklist:

- Walk around the house and look for any winter damage to window caulking and sealing.
- Hot weather is on the way so make sure your air conditioner is serviced and ready to go.
- Consider installing ceiling fans to improve the efficiency of your air conditioner.
- Check outdoor lighting fixtures for winter damage. Clean fixture covers and confirm you are using energy efficient bulbs.
- Install motion sensor lights or programmable timers for outdoor lights.
- Clean or change furnace filters.
- If you have central air conditioning, seal the seams of accessible furnace ducting with duct tape to ensure more cooled air reaches its destination.
- Vacuum the condenser coils on your refrigerator and freezer.
- Turn off the power at the panel and vacuum lint from the clothes dryer motor, drum and exhaust hose.
